CAREER SUMMARY:

Experienced Software Engineer in Test with almost 3 years of expertise in Agile methodologies, automation testing, and security testing. Proven track record of designing and executing successful test plans, ensuring software quality, reliability, and security. Proficient in various testing tools and possess strong analytical, problem-solving, communication, and teamwork skills. Ready to make a valuable contribution to any software development team.

WORK EXPERIENCE:

Funding Societies | Modalku

Software Engineer in Test | October 2021 - November 2023

- Designed and executed Karate API tests to ensure proper functionality and compatibility
- Utilized Postman to design and execute API tests, ensuring proper functionality and compatibility
- Conducted database testing using PostgreSQL in Dbeaver
- Collaborated with the development team to identify and resolve defects and issues using Confluence
- Tested various features and functionalities of Pipedrive CRM software, ensuring their quality and usability
- Experienced in utilizing email marketing platforms, such as SendGrid, to create and test email campaigns
- Designed and executed test plans and test cases for various software applications using Agile methodologies and incorporated security testing measures
- Performed various types of testing, including functional, regression, performance, and smoke testing
- Conducted manual testing when required and documented test results
- Participated in sprint planning, retrospectives, and daily standup meetings and provided status updates
- Worked closely with project managers and stakeholders to ensure the timely delivery of quality software products using Agile methodologies
- Conducted testing on staging and UAT environments

Microperts

Quality Assurance Manager | February, 2021 - September, 2021

- Played a key role in testing mobile and web applications
- Employed Agile methodologies to design and implement effective test plans and cases that included security testing measures
- Conducted manual testing as necessary and diligently documented test results
- Worked collaboratively with the development team to pinpoint and resolve issues and defects
- Assisted project managers and stakeholders in ensuring the timely delivery of quality software products, leveraging Agile methodologies as appropriate
- Successfully mapped and implemented all elicited requirements from customers during development process

EDUCATION:

2017 - 2021 | The University Of Lahore
Bachelor of Science in Software Engineering

CERTIFICATIONS:

- Karate DSL: API Automation and Performance from Zero to Hero
- Agile Leadership
- IELTS

SKILLS AND TOOLS:

- Proficient in Agile test planning and execution for web and mobile applications
- API testing using Postman
- API automation scripting using the Karate framework
- Project management using JIRA
- Performance testing using JMeter
- SQL and database testing using PostgreSQL
- Test management using QMetry
- Bug tracking using Kualitee
- Selenium WebDriver for web application automation.
- Experienced in working with Pipedrive, a popular CRM software
- Proficient in testing email campaigns on platforms like SendGrid
- Strong analytical and problem-solving skills
- Excellent communication and teamwork skills
